-Notes-

No updates will be issued intraday.

Market Open refers to Globex first trading period after settlement, typically 1800 EST.

Frameworks are reassessed at the next settlement.

Risk may be expressed either as a price reference or as a point distance.

When risk is expressed as a point distance, the effective risk reference is capped at a maximum of 500 points from activation.

This framework provides reference levels only and does not constitute trade instruction, execution guidance, or position management.
